

Ubiquitous Genomics – Spring 2021 syllabus

by: Yaniv Erlich (erlichya@gmail.com)

#	Date	Title	Topics
Module 1: Foundations			
1	12/3/21	Introduction to DNA	<ol style="list-style-type: none"> 1. Why DNA? 2. The building blocks of DNA 3. RNA vs DNA 4. The world of DNA
2	19/3/21	DNA information flow	<ol style="list-style-type: none"> 1. What's life? 2. DNA copying 3. Crick's Dogma and how to win a Nobel prize 4. The smallest organism 5. From gene to genome 6. Mutations
Module 2: Reading DNA			
3	9/4/21	Technologies to gather DNA information	<ol style="list-style-type: none"> 1. qPCR 2. Arrays 3. Sequencing (Sanger, Illumina, PacBio, Oxford Nanopore)
4	16/4/21	Biological datasets and the main sequencing pipeline	<ol style="list-style-type: none"> 1. Shotgun sequencing 2. Alignment 3. Variant calling 4. Imputation 5. FASTA/FASTQ 6. BAM 7. UCSC genome browser
5	23/4/21	SARS-CoV-2 genome presentations	
Module 3: Processing DNA (in human)			
6	30/4/21	Human genetics I: diseases	<ol style="list-style-type: none"> 1. Quick guide to the human genome 2. Rare genetic diseases 3. Exome sequencing 4. GWAS 5. Polygenic risk scores
7	7/5/21	Human genetics II: relative matching	<ol style="list-style-type: none"> 1. Recombination 2. Identify by descent (IBD) 3. Algorithms to identify IBD 4. Finding relatives
8	14/5/21	Ethical and privacy aspects of DNA information	<ol style="list-style-type: none"> 1. The three main methods of genome hacking 2. Side channel leakages 3. Ethical discussion
9	21/5/21	Hackathon II: genome hacking presentations	
Module 4: Writing DNA			
10	28/5/21	DNA writing technologies	<ol style="list-style-type: none"> 1. Why to write? 2. Writing technologies: column synthesis, ink jet printers, photolithography, chemical electric synthesis 3. On the mathematical representation of synthesis

			<ul style="list-style-type: none"> 4. Genome-scale synthesis 5. Ethical discussions
11	4/6/21	Eldad Stibon: citizen scientists	
12	11/6/21	DNA Storage	<ul style="list-style-type: none"> 1. Encoding decoding methods 2. DNA of things 3. Photo similarly search using DNA
13	18/6/21	Final presentations
